

Teseo uccide il Minotauro e riesce a scappare dal labirinto .

Il re di Creta accusa Dedalo di averlo aiutato .

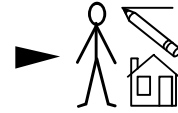

Ma ad aiutare Teseo era stata la figlia del re Arianna con

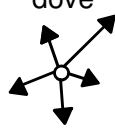

il suo filo

Dedalo è l'architetto che ha progettato il labirinto

dove era rinchiuso il Minotauro.

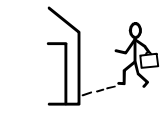

Il minotauro era il figlio del re di Creta Minosse .

Così Minosse rinchiede Dedalo e suo figlio Icaro nel labirinto.

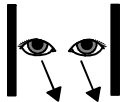

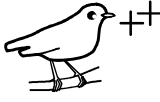

Dedalo è triste e vuole tornare a casa.

Dedalo pensa che per uscire dal labirinto deve volare

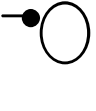

Così osserva gli uccelli e capisce come costruire le ali .

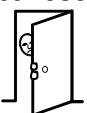

e imparare a volare .

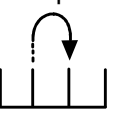

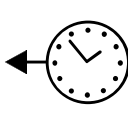

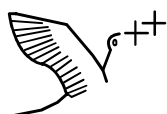

Icaro guarda suo padre studiare e lavorare

ed è molto curioso e attento .

Dopo aver costruito le ali Dedalo studia la strada per

scappare dal labirinto con suo figlio ma è molto preoccupato per Icaro

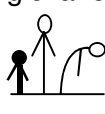

Icaro è molto giovane e coraggioso ma non capisce che volare è pericoloso .

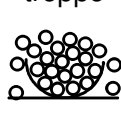

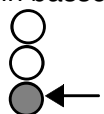

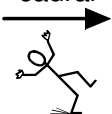

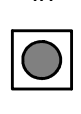

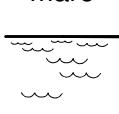

Dedalo avverte Icaro :

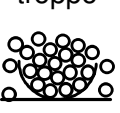

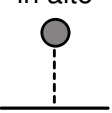

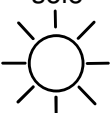

" non volare troppo in basso o cadrai in mare e

non volare troppo in alto o il sole scioglierà le ali

fatte con cera e piume e tu cadrai in mare "

Dedalo e Icaro partono in volo

Ma Icaro vola vicino al sole , le ali si sciolgono.

Disperato Dedalo vede Icaro cadere in mare .

Icaro cade in mare vicino all'isola di Samo .

Per ricordare Icaro il mare vicino a questa isola si chiama Icaro .
